

Things are going too far when the government is fearful of braodcasters and their listeners exercising there right to freedom of speech. This being part of our rights as citizens of the U.S.A. The common sense right of any American is...if your don't like what you 'see' or 'hear'...turn the t.v. channel or the radio station! There is something for everyone. If I'm offended of the numerous Foreign t.v. program that constantly seem to bombard my (in)American t.v. or radio does that mean the gov't should censor it or ban it altogether? No! They shouldn't act as the voeuyers of the citizens of this 'Free World' in which our ancestors struggled beyond any means to get to the 'Land of Liberty' ..the Melting Pot. Meaning...having the rights and freedoms entitled to every American...for all of the different beings in this 'Democracy'!! XM Satellite is part of the right of every resident of the U.S.A. and to silence it would be inviolation of our Righy to Freedom of Speech. When Political Speeches or News programming of an event deemed important enough, the viewing public is forced to view such events without a choice unless we.... turn off the radio or t.v. We all survive with our innate abililty to choose what we want to see or hear on theradio or t.v. If I purchased XM I know what I will be hearing. There is no one you will be protecting (in your opinion) With XM Satellite if you don't subscribe you won't be offended by what you hear! And even then you still have the CHOICE to turn the station. You've already taken care of the publics right to switch (choice) stations on public radio--what about spanish t.v. stations they are more risque that our U.S. shows!

Please don't start diminshing the importance of our Amendments Rights. Think about the struggle of our founding Fathers and their journey getting here.
